CarPC JoyCon EX converts car steering wheel remote controllers into a PC USB keyboard. You can control MediaPlayer or front-ends (eg. CentraFuse) with your steering wheel audio remote controller. As the buttons of your steering wheel controller are mapped to PC keys of your choice, you will be able to control any software which can be controlled with PC keys from a keyboard.

Hardware feature

- Converts resistive steering wheel remote controls into USB HID keyboard and HID remote controller.

- Works same as standard USB HID keyboard and HID remote controller by hardware.
- 24V tolerant 4 channel resistive(voltage) input.
- Supports 28 physical buttons, 52 programmable logical buttons.
- Long and Short button for one physical button, up to 5 simultaneous key strokes by one button.
- 2 programmable LED port.
- Remote wake-up(resume PC from sleep with steering wheel remote controls).
- Channel Master/Slave selectable
- Temperature range : -40 ~ +85°C

JoyCon Explorer-aided feature

- Preset change by Preset up and down buttons.
- Speech and OSD when preset is changed, when button is pressed.
- Application link(application launches and pops up with preset changing).
- User definable Button Speech and OSD.
- Automatic Button Detection
- Rearview with USB camera
- Online firmware update.

- No external power or driver installation needs.

- Available OS : Windows 7, Vista, XP, 2003

(JoyCon Explorer supports Windows XP and the later version. JoyCon Explorer does not support Linux. But CarPC JoyCon Exr works on Linux and Mac after it is configured at Windows.)

Connect two wires of CarPC JoyCon Exr's input channel to the remote controls, and connect USB.

This is the typical resistance-output steering wheel remote controller's circuit. You can put additional buttons like green box below by DIY, if you want.

You can control two external LED.

UserGuide http://www.changjack.com/user_guide/cpjexr/CarPC_JoyCon_Exr_UserGuide_eng.pdf

You can use typical USB cam as a rearview camera with CarPC JoyCon Exr. Any USB camera or video capture device can be rearview camera.

Rearview pops up when Channel C detects reversing light,

How to use Steering wheel remote controls in Centrafuse

Supported cars(reported so far):

Alfa Romeo 156 2.0 JTS Chevrolet Captiva Chevrolet Cavalier Citroen Xantia Citroen XSARA 1997-2000 Dodge Durango Fiat GrandePunto Ford Fiesta Ford Focus Ford Fusion 2010 Ford Mondeo Ford Mondeo MK2 1996-2000(Resistive PCB is required) Ford Ranger(Cruise control only) GM Cadilac Escalade 2002 GM Daewoo all model Honda CRZ Honda Ridgeline

Hyundai all model(except Sonata2/3, Marcia, Santamo) KIA all model Land Rover Discovery 4 Mazda3 2004-2009 Mitsubishi 380GT 2006 Nissan 350Z Nissan Cube Nissan Murano Nissan Navara 2007 Peugeot 306(Resistive PCB is required) Peugeot 806 Pontiac Firebird 96 Renault Samsung SM5/7(Audio controller only) Rover SAAB 9-3 9-5 Scion TC 2006 Subaru Impreza Suzuki SX4 Toyota Camry 2005 - 2010 Toyota Corolla 2004(Cruise control only) Toyota Corolla 2009-2010 Toyota Land Cruiser 2004 Toyota Landcruiser 200 series (2007 - 2010) Toyota Lexus 330 Toyota supra 1990 Toyota Yaris Vauxhall Astra G 1998-2004 Vauxhall Vectra 1999-2002 Vauxhall Vectra B 1996-2002 Vauxhall Zaffira A 1998-2005 and many other cars with resistive steering wheel controls

Supported remote controller: Sony RM-X2S

Sony RM-X11M

What is different Exr from Ex?

Exr is almost same with Ex.

Exr can select master/slave mode by software option(at JoyCon Explorer). Master mode is to connect CPJexr to PC only. Slave mode is to connect CPJexr both to PC and Car Radio.

In the previous EX version, user had to desolder the diodes on the PCB manually to use slave mode.

And Exr has an extension port for future upgrade.
